# **Rockwell Automation, Inc.**

# **SLC-500 Series**

# **Ethernet Driver**

Supported version TOP Design Studio V1.0 or higher

# CONTENTS

We would like to thank our customers for using M2I's "Touch Operation Panel (M2I TOP) Series". Read this manual and familiarize yourself with the connection method and procedures of the "TOP and external device".

## 1. System configuration Page 2

Describes the devices required for connection, the setting of each device, cables, and configurable systems.

## 2. External device selection Page 3

Select a TOP model and an external device.

**3.** TOP communication setting

### Page 4

Describes how to set the TOP communication.

## 4. External device setting Page 9

Describes how to set up communication for external devices.

### 5. Supported addresses Page 10

Refer to this section to check the addresses which can communicate with an external device.

# 1. System configuration

The system configuration of TOP and "Rockwell Automation, Inc. - SLC-500 Series Ethernet" is as follows:

Series	CPU	Link I/F	Communication method	System setting	Cable
SLC-500	SLC 5/03 SLC 5/04 SLC 5/05	1761-NET_ENI	Ethernet(TCP)	3. TOP communication setting 4.1. External device setting 1	Twisted pair cable
31C-300	SLC 5/05	CPU Direct	Ethernet(TCP)	3. TOP communication setting 4.2. External device setting 2	*Note 1)

\*Note 1) Twisted pair cable

- Refer to STP (Shielded Twisted Pair Cable) or UTP (Unshielded Twisted Pair Cable) Category 3, 4, 5.

- Depending on the network configuration, you can connect to components such as the hub and transceiver, and in this case, use a direct cable.

#### ■ Connectable configuration

• 1:1 connection (one TOP and one external device) connection

# 2. External device selection

■ Select a TOP model and a port, and then select an external device.

# 3. TOP communication setting

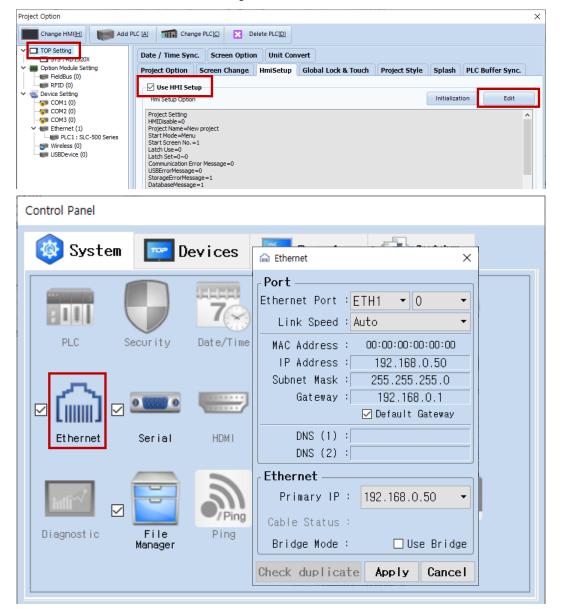

The communication can be set in TOP Design Studio or TOP main menu. The communication should be set in the same way as that of the external device.

### 3.1 Communication setting in TOP Design Studio

#### (1) Communication interface setting

■ [Project > Project Property > TOP Setting] → [Project Option > "Use HMI Setup" Check > Edit > Ethernet]

- Set the TOP communication interface in TOP Design Studio.

Items	ТОР	External device	Remarks
IP Address*Note 1) Note 2)	192.168.0.50	192.168.0.51	
Subnet Mask	255.255.255.0	255.255.255.0	
Gateway	192.168.0.1	192.168.0.1	

\*Note 1) The network addresses of the TOP and the external device (the first three digits of the IP, <u>192</u>. <u>168</u>. <u>0</u>. 0) should match.

\*Note 2) Do not use duplicate IP addresses over the same network.

\* The above settings are examples recommended by the company.

Items Description	
IP Address Set an IP address to be used by the TOP to use over the network.	
Subnet Mask Enter the subnet mask of the network.	
Gateway	Enter the gateway of the network.

#### (2) Communication option setting

- [Project > Project Property > Device Setting > ETHERNET > "PLC1 : SLC-500 Series"]
  - Set the options of the SLC-500 Series Ethernet communication driver in TOP Design Studio.

Project Option		×
Change HMI[H] Kange Add PLC A Change PLC[C] Change PLC[C]		
PLC Setting[SLC-500 Series]          PLC Setting[SLC-500 Series]         Alas Name:         Price Setting         COMM (0)         COM (0)         Port         HBBB (0)	Co	mm Manual
	Apply	Close

\* The above settings are examples recommended by the company.

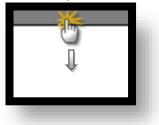

Items	Settings	Remarks
Interface	Select "Ethernet".	Refer to "2. External
Protocol	Select "Ethernet/IP".	device selection".
IP	Enter the IP address of the external device.	
Ethernet Protocol	Selects the Ethernet protocol "TCP" between the TOP and an external device.	Fixed
Port	Enter "44818", which is the Ethernet communication port number of the external device.	Fixed
TimeOut (ms)	Set the time for the TOP to wait for a response from an external device.	
SendWait (ms)	Set the waiting time between TOP's receiving a response from an external device and	
	sending the next command request.	
Port		
Slot No	Enter the slot number of the external device.	

### 3.2. Communication setting in TOP

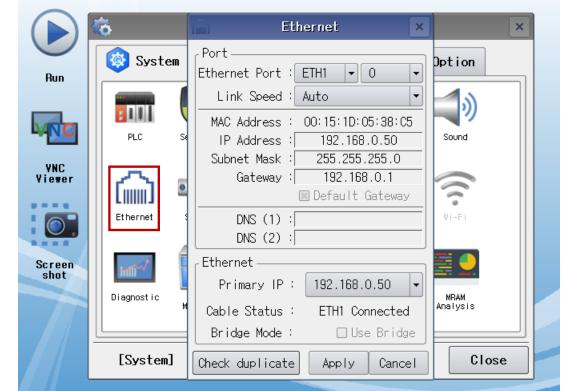

\* This is a setting method when "Use HMI Setup" in the setting items in "3.1 TOP Design Studio" is not checked.

■ Touch the top of the TOP screen and drag it down. Touch "EXIT" in the pop-up window to go to the main screen.

#### (1) Communication interface setting

■ [ Main Screen > Control Panel > Ethernet ]

Items	ТОР	External device	Remarks
IP Address*Note 1) Note 2)	192.168.0.50	192.168.0.51	
Subnet Mask	255.255.255.0	255.255.255.0	
Gateway	192.168.0.1	192.168.0.1	

\*Note 1) The network addresses of the TOP and the external device (the first three digits of the IP, <u>192</u>, <u>168</u>. 0) should match.

\*Note 2) Do not use duplicate IP addresses over the same network.

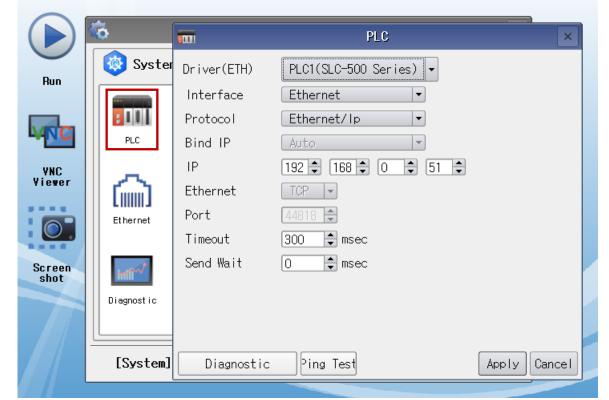

\* The above settings are examples recommended by the company.

Items Description	
IP Address	Set an IP address to be used by the TOP to use over the network.
Subnet Mask Enter the subnet mask of the network.	
Gateway	Enter the gateway of the network.

#### (2) Communication option setting

■ [Main Screen > Control Panel > PLC]

 $\ast$  The above settings are  $\underline{examples}$  recommended by the company.

Items	Settings	Remarks
Interface	Select "Ethernet".	Refer to "2. External
Protocol	Select "Ethernet/IP".	device selection".
IP	Enter the IP address of the external device.	
Ethernet Protocol	Selects the Ethernet protocol "TCP" between the TOP and an external device.	Fixed
Port	Enter "44818", which is the Ethernet communication port number of the external device.	Fixed
TimeOut (ms)	Set the time for the TOP to wait for a response from an external device.	
SendWait (ms)	Set the waiting time between TOP's receiving a response from an external device and	
	sending the next command request.	
Port		
Slot No	Enter the slot number of the external device.	

### **3.3 Communication diagnostics**

■ Check the interface setting status between the TOP and external device.

- Touch the top of the TOP screen and drag it down. Touch "EXIT" in the pop-up window to go to the main screen.
- Check if the ETH port settings you want to use in [Control Panel > Ethernet] are the same as those of the external device.
- Diagnosis of whether the port communication is normal or not
- Touch "Communication diagnostics" in [Control Panel > PLC].
- The Diagnostics dialog box pops up on the screen and determines the diagnostic status.

ОК	Communication setting normal
Time Out Error	Communication setting abnormal
	- Check the cable, TOP, and external device setting status. (Reference: Communication diagnostics sheet)

Communication diagnostics sheet

- If there is a problem with the communication connection with an external terminal, please check the settings in the sheet below.

Items	Contents		Ch	eck	Remarks

# 4. External device setting

### 4.1. External device setting 1 (1761-NET-ENI)

Set as below using [ENI/ENIW Utility] for communication settings.

For more detailed setting method than that described in this example, refer to the PLC user manual.

Step 1. From the [ENI IP Addr] tab of [ENI/ENIW Utility], configure the "IP Address : 192.168.0.51" and other settings.

Step 2. Download settings for 1761-NET-ENI.

### 4.2. External device setting 1 (CPU Direct)

Set as below using "SLC500 Series" Ladder Software "RSLogix500".

For more detailed setting method than that described in this example, refer to the PLC user manual.

Step 1. Create a new project from "RSLogix500".

Step 2. From the Project tree, go to [Controller] > [Channel Configuration] and select "Open".

**Step 3.** From the [Chan – 1 system] tab of [Channel Configuration] dialog box, configure the "<u>IP Address : 192.168.0.51</u>" and other settings.

Step 4. Download settings.

# 5. Supported addresses

The devices available in TOP are as follows:

The device range (address) may differ depending on the CPU module series/type. The TOP series supports the maximum address range used by the external device series. Please refer to each CPU module user manual and be take caution to not deviate from the address range supported by the device you want to use.
